

Customer Notes from Project Activity #4

Here are the key points summarizing the feedback from the client-side representative about our website:

- **Homepage Appreciation:** Users appreciated the layout and functionality of the homepage. The podcast section stood out,. The "join us" feature was also praised.
- **Membership Page:** Users appreciated the design and functionality of the membership page.
- **Categories Page:** The membership categories page was particularly well-received. This likely indicates that the categorization is logical and helpful, assisting users in navigating the site's content efficiently.
- **Color Scheme Approval:** The color scheme of the website was well-liked, suggesting it's visually appealing, and consistent, and aids in navigating the site effectively.
- **Consistent Design:** Users recognized and appreciated the consistent design throughout the website.
- **Ease of Exporting Data:** Users were impressed with the ease with which they could export form input data from the back-end by using the plugin.
- **Drag-and-Drop Functionality:** The drag-and-drop functionality for rearranging page sections was found to be easy and intuitive. This suggests that the website's user interface is well-designed and intuitive, offering a great user experience.
- **Understandable and User-Friendly Plugins:** The plugins used on the website were reported to be user-friendly and easy to

understand, indicating a well-chosen set of tools that enhance the site's functionality without complicating the user experience.

- **Transparent Header Style:** The transparency of the header was not received well by users. This could be due to various reasons such as difficulty in reading navigation labels, unappealing aesthetic look, or it distracts from the content underneath. This suggests the need for a design change, possibly with a semi-transparent or solid background.
- **Logo Visibility:** Users reported that the logo in the header is not clearly visible on some pages. This suggests that changes need to be made to enhance its visibility.
- **Events Tab:** Users felt that the events tab could be improved. The header problem is something we should work on (tried but still have not found the problem or reason for such background).
