

1. Navigation Confusion: We will ensure that there are clear and intuitive navigation elements that allow users to switch between different sections without any issues. We will address any missing links and ensure that all tabs and links are functional.
2. Mobile Sign-In Issue: We will investigate and resolve the issue where users were unable to click on the sign-in option in the mobile version. We will ensure that the sign-in option is easily accessible and does not cause confusion with other elements on the page.
3. Non-functional Navigation Bar: We will review and fix any issues with the navigation bar at the bottom of the home page in the desktop version. We will ensure that it functions as intended and provides a smooth user experience for users.
4. Images and Visual Design: We will address the issue of images being cutoff in various sections. We will ensure that all images are properly displayed and visible to users. Additionally, we will work on enhancing the color scheme and aligning elements to create a visually pleasing design.
5. Contact Form Alignment: We will adjust the alignment of elements in the contact form to improve the overall appearance and make it more visually appealing for users.
